

## SUDA SD3025Y Mini CNC Router Jewelry Engraving Machine

### Main features

- 1, Adopt the most advanced DSP controlling system.
- 2, Configure with 1.5kw water cooling spindle motor.
- 3, X, Y, Z all axis configured with THK linear rail from Japan, more stable movement in high accuracy.
- 4, Water cooling processing system, the dual waterproof design, to ensure the circuit is not affected.

### Suitable material:

Strong function, easy operation, sturdy, durable reliable performance, reasonable price, multi-functions and wide range of application make it possible to process any wooden products and applicable to process advertising sign plate, etc, any metal and non-metal materials can be processed, for example, iron, copper, aluminum, plastic plates and wood, etc.

## Technical Data

Model	SD3025Y
Working Area	300X250X60mm
Spindle motor	1.5KW
Motion Speed	0~8000rpm
Spindle Speed	6000~24000rpm
Engraving Tools	3.175,4,6mm(optional)
Dictate Format	G-CODE
Resolution	0.01mm
